

Awakening the DREAMER: The Symposium

Explore the current state of our planet from a new perspective and connect with the global and local movements working together to reclaim our future.

Together We Ask Four Questions

- **Where are we?** Explore the state of our environmental, social, and personal well being.
- **How did we get here?** Trace the root causes that lead to the current imbalance in our relationship to the environment, to one another, and to our own sense of purpose and fulfillment.
- **What's possible for the future?** Discover new ways of relating to one another and the Earth and connect with the global and local movement for change which is emerging right now in history.
- **Where to from here?** Understand who we are in the world and access ideas and information to empower personal change.

The Symposium has been designed in collaboration with some of the finest scientific, indigenous, visionary and activist minds in the world. It includes dynamic group interactions and leading edge information delivered through engaging multimedia presentations.

If you are ready to be inspired and moved to action, to be introduced to a thriving community of committed global citizens, then join us in exploring the most critical concerns of our times, and discover new opportunities to bring forth an **environmentally sustainable, spiritually fulfilling, and socially just human presence on this planet!**
